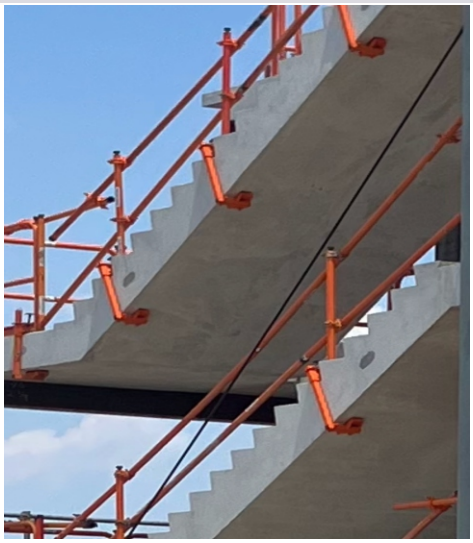
CONCRETE STAIR CLAMP TECHNICAL SHEET

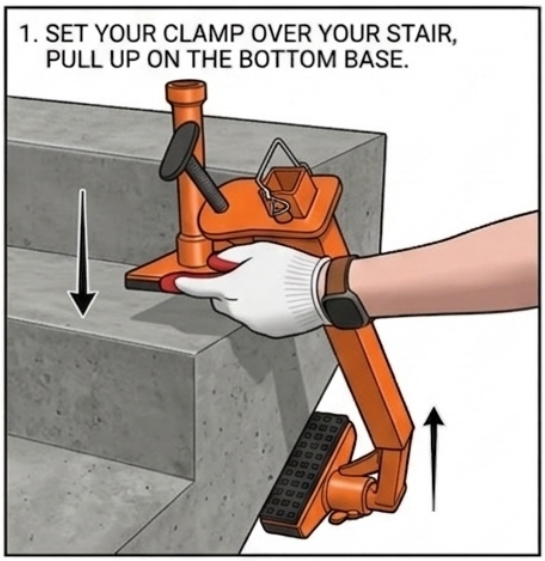
SwitchRail®
Modular Safety Rail System

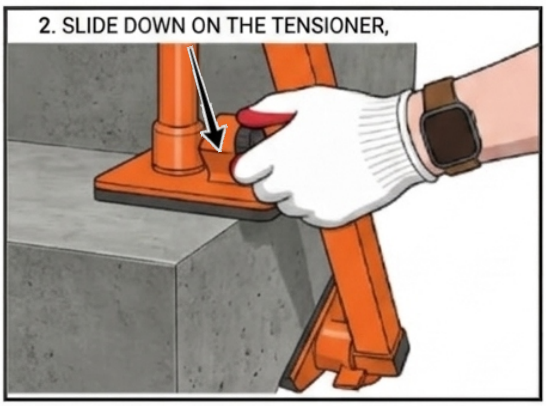
LCSC-LEFT CONCRETE STAIR CLAMP

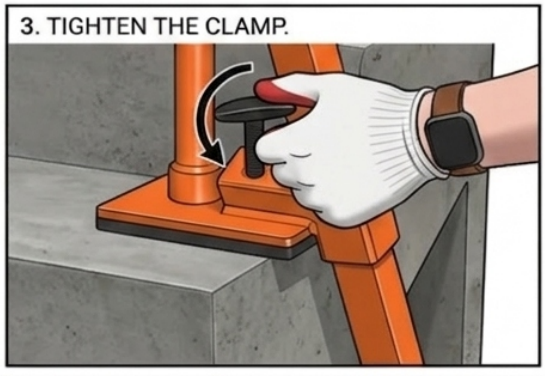
SRP42 - 42" SWITCHRAIL POST

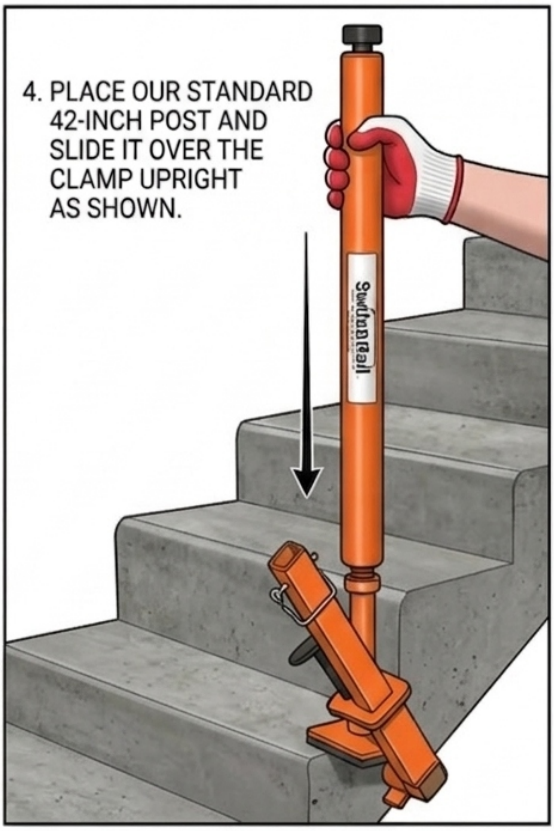


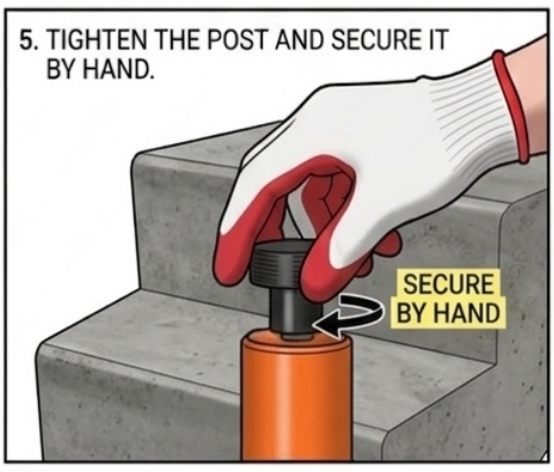
RCSC-LEFT CONCRETE STAIR CLAMP











System Requirements

- Installation shall be performed only after evaluation of the supporting structure.
- A designated competent person shall assess site conditions, stair construction, and suitability prior to installation.
- Supporting Concrete Stair must be verified by qualified personnel to have sufficient strength and stability to resist applied guardrail loads.

Limitations of Use

- Not designed or rated for personal fall arrest systems (PFAS).
- Not approved for tie-off, anchorage, or lifeline attachment.
- Guardrail system loads only; no dynamic arrest loading permitted.

Typical Installation Configuration

- Concrete Stair
- Standard Switch-Rail concrete Stair Clamp (LCSC/RCSC)
- SRP42 Post

Refer to Structure Support Stair Guard Rail Technical Sheet for railing installation and specifications.
